

SAFETY BASICS

HAND AND POWER TOOL SAFETY BASICS

Inspect all tools before use, including power cords and all accessories.

When using tools, have firm footing and maintain good balance.

Do not use dull blades or cutting edges.

Do not carry tools in back pockets - use a tool belt.

Ensure the materials you are working on are secured properly - use a clamp or vise when necessary.

Avoid working with power tools in wet environments.

Use the right tool for the job
