

Climate Action Premium Credit Pilot Program for Hospital System Policyholders

CLIMATE ACTION PLEDGE

Our organization recognizes that health care entities, particularly hospitals, are significant sources of the greenhouse gas (“GHG”) emissions that cause climate change, that climate change is a threat to human health and worker safety, and that it is critical to take action to manage the workplace risks associated with climate change.

Our organization voluntarily pledges to:

1. Work towards the goal of reducing GHG emissions throughout the operational entities covered by our workers’ compensation policy by:
 - at least 40% by 2030 and at least 85% by 2050 from 1990 levels (consistent with the objectives of the New York State Climate Leadership and Community Protection Act); or
 - at least 50% by 2030 (from a baseline no earlier than 2008) and achieve net-zero by 2050 (consistent with the Health Sector Climate Pledge offered by the U.S. Department of Health and Human Services);
2. Enhance our resilience to severe weather events and natural disasters arising from climate change; and
3. Develop and implement a Climate Action Plan describing how we will meet these objectives.
