

Climate Action Premium Credit Program for the Health Care Sector

CLIMATE ACTION PLEDGE

Our organization recognizes that the health care sector is a significant source of the greenhouse gas ("GHG") emissions that cause climate change, that climate change is a threat to human health and worker safety, and that it is critical to take action to manage the risks associated with climate change.

Our organization voluntarily pledges to:

1. Work towards the goal of reducing GHG emissions throughout the operational entities covered by our workers' compensation policy by:
 - ☐ at least 40% by 2030 and at least 85% by 2050 from 1990 levels; or
 - ☐ at least 50% by 2030 (from a baseline no earlier than 2008) and achieve net-zero by 2050
2. Enhance our resilience to severe weather events and natural disasters arising from climate change; and
3. Develop and implement a Climate Action Plan describing how we will meet these objectives.
